

### **Eduard Driessen and Timon Idema winners at NTvN contest.**

At this year's NTvN writing contest, two out of the three winners come from LION. The 2<sup>nd</sup> prize went to Eduard Driessen for his article "Wafer-thin but perfectly black". Timon Idema got the 3<sup>rd</sup> prize for his article "Structure, shape and dynamics of biological membranes".

Each year the Dutch physics journal, the NTvN, challenges PhD students and recently graduated PhD's to submit a well written article about their PhD research. The winners are announced at the annual congress of the Dutch Physics Society (NNV). The first prize went to Koos Gubbels from Radboud University, with his article "Ultra-cold Fermi-mixtures are super"
